The Next Generation **Fiberglass**
Door with **Eco-Friendly** Aspects

FiberLast

DEFINING CHOICES

JELD-WEN Exterior Doors | Fiberglass | Steel

Whatever you need your front door to be, JELD-WEN can fulfill your requirements. We make the greatest range of reliable exterior doors to suit a variety of architectural styles, climates and budgets. JELD-WEN Fiberglass exterior doors are a low-maintenance choice with beautiful details and designs to increase curb appeal. They are designed to meet ENERGY STAR® requirements for 2010*; and are reliable and worry-free. We also offer the full breadth of steel doors in 24-gauge and 25-gauge steel door designs.

Architectural | Fiberglass

It's all about the details. These doors feature greater detailing for a more genuine wood appearance, and they're made to be architecturally authentic.

- » Mahogany woodgrain designs with raised moulding
- » Oak woodgrain designs with detailed panel profiles
- » Mahogany woodgrain doors feature new hardwood edge and improved graining for a genuine wood appearance
- » Energy efficient core
- » Beautiful glass inserts in a wide variety of styles
- » Available in 6'8" and 8'0" heights. Please check for availability

New

FiberLast™ | Fiberglass*

The first fiberglass door that combines durability, energy efficiency and recycled content.

Eco-Friendly Aspects

- » 35% recycled content with blend of fiberglass and wood fibers
- » Meets 2010 ENERGY STAR® requirements**

Durable

- » Dent and weather resistant
- » More stable under extreme heat and cold than standard fiberglass or steel doors

Beautiful

- » Choose smooth or woodgrain white for painting, or woodgrain tan for staining

* Patent pending

** Energy performance ratings will vary with glass selection

DEFINING CHOICES

Design-Pro | Fiberglass

- » The look of wood with low-maintenance in mind
- » Energy efficient core
- » Composite capped edges for enhanced protection against harsh weather conditions
- » Wide selection of glass inserts
- » Available in 6'8" and 8'0" heights. Please check for availability

Smooth-Pro | Fiberglass

- » Smooth fiberglass with high definition panels
- » Energy efficient core
- » Composite capped stiles and rails for enhanced protection against harsh weather conditions
- » Available in 6'8" and 8'0". Please check for availability

24-Gauge and 25-Gauge | Steel

- » Designed for strength, durability and protection
- » Galvanized steel with baked on enamel primer for easier finishing
- » Energy efficient core
- » Optional 22-gauge steel edge construction for added durability and fire ratings up to 90-minutes (for true fire protection, doors must be used with a certified door frame, hardware and components)

JELD-WEN makes selecting your door easy

Beyond their clean design | JELD-WEN® exterior doors include many qualities that make them a beautiful choice. They're enduring. They're energy efficient. And they're perfectly low-maintenance. Options like decorative glass or blinds between the glass offer everyday beauty and convenience. Add sidelights or a transom to create your unique entry door system. Here are a few standard system configurations to choose from:

1 Choose Door Type

Fiberglass

Fiberglass doors give the look of wood without the upkeep. They won't dent, warp, rust or rot and resist shrinking and swelling.

FiberLast™ Fiberglass

Environmentally friendly doors. The durability and low-maintenance of fiberglass with eco-friendly aspects because of their recycled content.

Steel Doors

Select steel exterior doors as an affordable, low-maintenance choice. They provide strength and energy efficiency.

2 Choose Door Panel Style

Personalize your home with a door that suits your home's architecture. Add sidelights or a transom for the entry of your dreams. Here are just a few options.

3 Select your Doorglass

Decorative doorglass will brighten your entryway without compromising privacy. Choose from any of the featured glass designs on the following pages. Please refer to the matrix on pages 32-33 for the complete list of glass options by door type.

Glass privacy ratings help you choose the right level of opacity for your home.

ARCHITECTURAL DOOR DESIGNS

These doors feature greater detailing for a more genuine wood appearance, and they're made to be **architecturally authentic**. | For example, flat-paneled Craftsman designs are ideal for homes with Mission, Prairie, Shaker and Craftsman architecture. Our charming plank door designs compliment Old World home styles. And the distinctive look of our Mahogany woodgrain designs with raised moulding will enhance any home. Only JELD-WEN® offers so many fiberglass door designs and options.

Model numbers explained | Each model number contains a reference to the door type, glass size and glass design. For example; AC stands for Architectural Craftsman, 816 for the Camber Top size, KP stands for Oak Park. This naming system has been applied to all of our doors and simplifies the order process.

GLASS OPTIONS

Handcrafted decorative doorglass adds beauty and mystique to your door. | Our enduring designs serve as a focal point for your home, a reflection of your personal style, and a bridge between you and the world outside. These beautiful glass designs are sure to meet any architectural or design need. We even offer products such as blinds between the glass.

The glass options shown on pages 38-97 are available in either **FiberLast™**, **Design-Pro Oak**, **Design-Pro Mahogany**, and **Smooth-Pro** fiberglass doors depending upon the door style selected. The same glass options may also be available with our 24-gauge steel or 25-gauge steel doors. Please refer to the availability matrix on pages 32-33.

Smooth-Pro with Tripoli Glass (SP-684TP)

FiberLast with Tripoli Glass (FK-684TP)

Design-Pro Mahogany with Tripoli Glass (DM-684TP)

Contours™ Steel with Tripoli Glass (CT-684TP)

Design-Pro Oak with Tripoli Glass (DO-684TP)

Model numbers explained | Each model number contains a reference to the door type, glass size and glass design. For example; DO stands for Design-Pro Oak, 684 for the half view size and TP stands for Tripoli. This naming system has been applied to all of our doors and simplifies the order process.

DO	684	TP
Design-Pro Oak	Glass size	Glass design

GLASS OPTIONS

The below chart is designed to give you a quick overview of our door and glass offering. Please refer to the specifications pages for our complete door offering, or to the glass pages below for more information on the glass.

The Next Generation **Fiberglass**
Door with **Eco-Friendly** Aspects

35% Recycled Content*

From recycled wood fibers blended with Fiberglass.
Certified by Scientific Certifications Systems for recycled content.

Supports Improved Air Quality In The Home

Meets California Air Resource Board (CARB)
regulations for No Added Urea Formaldehyde (NAUF).

Saves Energy - Meets 2010 ENERGY STAR® requirements**

- * Recycled wood fiber is pre-consumer. Note recycled content percentages refer to the door slab and do not include the door frame and/or frame components.
- ** Energy performance ratings will vary with glass selection.

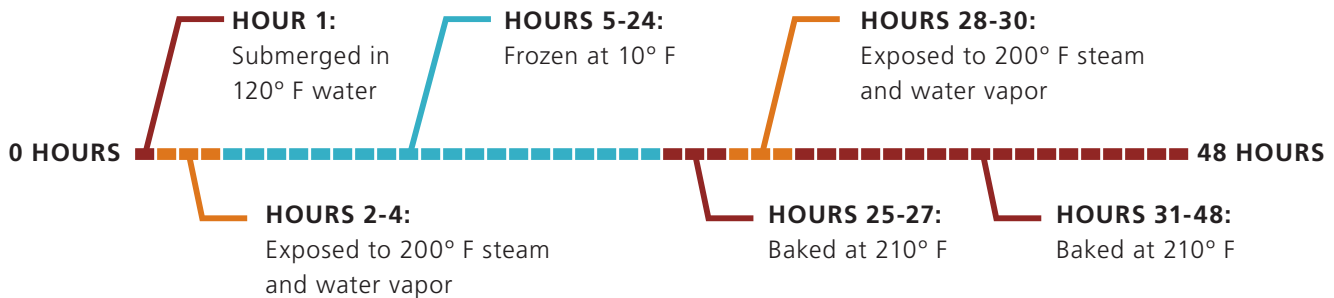

FIBERLAST™ DOOR DESIGNS

FiberLast fiberglass entry doors are made with a patented* technology that combines the weathering resistance and durability of fiberglass with the appearance and environmentally friendly characteristics of wood fibers.

In addition to FiberLast's environmentally friendly aspects, the doors are more dent resistant and stable in extreme heat and cold temperatures compared to standard fiberglass and steel doors.

Just How Durable is FiberLast?

FiberLast Fiberglass doors have passed a barrage of tests from dent resistance to structural performance to energy efficiency and more. In fact, FiberLast door skins even reliably pass the ASTM D1037 Accelerated Weathering test typically used on exterior products like cement board siding.

48 hour test cycle completed 6 times. Now that is durable!

FiberLast Fiberglass Door Construction

The Ingredients of Durability

- A. AuraLast® stiles and rails. Composite bottom rail prevents moisture absorption
- B. 1-1/4" lock stile is reinforced with a full-length 2-3/4" LVL lockblock
- C. Exterior-grade primer
- D. Energy efficient core. Polyurethane foam core gives the door the feel of solid wood.

- » 1-3/4" door
- » SCS certified 35% pre-consumer recycled content*
- » AuraLast® stile and rails
- » Full length 2-3/4" LVL lockblock
- » Exterior grade primer
- » 20-minute fire rated construction available**

* Recycled content percentages refer to the door slab and do not include the door frame and/or frame components.

Fire-Rated Doors

Our fire-rated fiberglass doors are made to meet or exceed local fire rating building codes for both residential and light commercial use.

** For true fire protection, these doors must be used with certified frames and hardware.

RELIABILITY for real life®

DESIGN-PRO DOOR DESIGNS

Each Design-Pro door is created to look like wood and is built with strength, stability and reliability in mind. In fact, these doors are made to stay attractive longer, with less maintenance in any climate. We've created many versatile designs in Mahogany or Oak woodgrain. Our doors coordinate with a full range of decorative glass types and sidelights. Check with your local dealer for glass, door design and size availability.

Each Design-Pro door is backed by a limited lifetime warranty; review it at www.jeld-wen.com.

STEEL DOOR DESIGNS

Every JELD-WEN® Steel exterior door is durable and affordable. | They include wood stiles and rails with mitered top corners to prevent water absorption. Galvanized exterior door facings are factory-primed with neutral, low-sheen, baked-on enamel primer for easy finishing. Our wide range of steel doors include designs with beautiful decorative glass, popular grille patterns, textured glass, or blinds between glass. Additionally, all standard glass designs fit these doors. Please check with your local dealer for glass, door design and size availability.

Each JELD-WEN Steel door is backed by a 10-year limited warranty; review it at www.jeld-wen.com.

24-GAUGE STEEL DOORS

Contours™ Designs (CT)

These doors feature a tough, **24-gauge** galvanized steel skin that features our exclusive beaded sticking profile. They're available with an optional steel edge that delivers added security and a fire rating of up to 90 minutes.

Energy Saver® Designs (ES)

In addition to a strong, **24-gauge** galvanized steel door facing, these doors feature a classic panel design and are available with an optional steel edge for increased security and a fire rating of up to 90 minutes.

Contours Profile

Energy Saver Profile
Gladiator Profile
FiniShield Profile

25-GAUGE STEEL DOORS

Gladiator® Designs (GD)

Our Gladiator collection includes construction-grade steel doors with durable **25-gauge** steel skins.

FiniShield® Designs (FS)

These economical steel doors have **25-gauge** steel skins with two coats of baked-on enamel and are covered in a prefinished seven-mil layer of oak-textured vinyl.

IMPACT AND COASTAL RATED DOORS

If you live near the coast or in an area prone to hurricanes, your home is subject to harsh and potentially dangerous conditions. That's why your door choices are crucial to your home's survival.

JELD-WEN offers select door systems with features that allow them to stand up to salt air, coastal moisture, severe winds and the dangerous wind borne debris from hurricanes.

The doorglass used in our door systems is certified for use in various entry systems to meet Florida and Texas code requirements. The glass is also designed to maximize natural light, making it an attractive alternative to hurricane shutters.

Visit www.jeld-wen.com and your **JELD-WEN dealer** for specific details on door systems requiring coastal certifications.

PREHUNG SPECIFICATIONS

The JELD-WEN Door System

All JELD-WEN doors are available with our prehung option. This comprehensive package ensures the smoothest installation of your JELD-WEN door. Ask your dealer for available prehung options.

- 6'8", 7'0" and 8'0" systems
- Doors available in both inswing and outswing configurations

Multiple frame depths available
4-9/16"; 5-1/4"; 6-9/16"; 7-1/4"

Select your Configuration

Exterior doors configurations come in a variety of styles and price points. Choose one that's right for you. Here are a few standard system configurations to choose from:

Single Door

Single Door with Sidelight

Single Door with two Sidelights

Single Door with Transom

Single Door with Sidelights and Transom

Double Doors

Double Doors with Sidelights

AuraLast® Wood Exterior door frames

AuraLast Wood offers virtually 100% surface to core protection guaranteed. Nail and screw holes will not compromise the shield of AuraLast protection.

Protects Against Wood Rot

JELD-WEN® exterior door frames and components with AuraLast Wood are protected against wood rot, so they'll maintain their structural integrity even in the harshest weather and most severe climates.

Protects Against Termites

Termites cause significant damage to unprotected wood, JELD-WEN exterior door frames and components with AuraLast Wood protects against the harmful attack of termites.

Protects Against Water Saturation

AuraLast Wood offers superior resistance to water saturation and protects wood against swelling. This helps prevent the door from sticking and it will open and close easily regardless of environmental conditions.

Environmentally Friendly Aspects

The AuraLast water-based, vacuum-pressure process, protects the environment as well as the product. 96% fewer volatile organic compounds (VOC's) are released during the manufacturing process than during traditional wood submersion/dip treatment methods.

AuraLast Wood door frames can be stained or painted to match any wood tone/color application and no pre-sealers are needed.

Appropriate Protection for Exterior Doors

The protection of your door is a major factor in its maintenance requirements and longevity. To adequately protect your door and extend its life, you have to consider several factors. You'll need to take into account the door type, climate, exposure, color choice and the use of a storm door.

Every door type weathers differently. Wood doors, for example, are more susceptible to the elements than steel or fiberglass. Here are some guidelines as you consider the type of door you install, the finish you choose, and how much overhang protection is needed.

Overhangs

Depending on the climate and the direction the door faces, wood doors will require some sort of protective overhang. A formula to help you determine the correct overhang for your wood door in most cases is: $Y = 1/2X$. For example, if the measurement from the

base of the door to the bottom of the overhang is 10 feet, then the overhang should extend at least 5 feet. In most climates, an overhang as shown in the illustration is required for wood doors, and suggested for all exterior doors. Keep in mind that overhangs are always wise, even for steel and fiberglass doors.

You also need to take into account the variables specific to your region. The climate and the direction a door faces play a key role in determining a proper overhang. Typically, southern and western exposures are harshest. With southern exposures, the sun beats down on the door from sunrise to sunset. In western exposures, the door receives sunlight in the hottest part of the day. Please consult the chart below and adjust the length of the overhang as needed.

Without correct overhangs, doors with a southern, southwestern, southeastern or western exposure will require more frequent maintenance. Doors with these exposures may experience performance problems such as rapid finish deterioration, color fading, wood splitting, warping, moulding shrinkage, wood joint separation, and water penetration between the mouldings, panels and glass.

With proper overhangs, doors may face any direction (north, south, east or west). Doors installed in these types of applications still require finish maintenance. Wood doors, for instance, may need to be refinished every two to five years.

Color Choice

No matter what type of exterior door you install, color choice may affect how quickly the exterior of the door weathers in extreme climates. In general, darker colors absorb more heat than lighter colors. The exterior face of a door exposed to the sun in harsh environments can reach temperatures well in excess of 120 degrees. As a rule of thumb, if you can't hold your hand on the face of the door for more than 30 seconds, the door is too hot. These extreme temperatures can cause noticeable damage to the door including finish deterioration and accelerated color fading. In addition, extreme temperature changes can cause warping, sticking and other performance problems. For doors with little protection or doors installed in hot environments, light colors may help reflect the heat and slow down heat build-up. Depending on the exposure and environment, other precautions (such as overhangs) should be taken to protect your door from the effects of the sun.

Storm Doors

Storm doors provide additional protection for your door in many climates. They shelter the door mainly from rain and wind, though a storm door with dual-pane Low-E glass will also block UV rays. In hot climates or if the exterior door gets more than a few hours of direct sun each day, adding a storm door may not be a good choice. It may trap too much heat and cause the surface temperature of the door to raise above 150F. This may cause substantial damage — such as warping, color fading and wood joint separation — to the door and be dangerous to the touch. Please note, a storm door in front of a dark colored exterior door can accelerate heat buildup even more.

JELD-WEN Warranties

This document provides general information about measures that can be taken to better protect exterior doors, but no warranties, whether express or implied, are provided by this document. For specific product information and available product warranties, please refer to www.jeld-wen.com or contact JELD-WEN Customer Service at 888-JWHELP.

JELD-WEN® INTERIOR AND EXTERIOR DOOR SLAB AND SYSTEM LIMITED WARRANTY

OUR WARRANTY TO YOU...

JELD-WEN® Products¹ are designed to create lasting value for your home. This warranty is effective for JELD-WEN products manufactured on or after **July 1, 2010** for use in the United States and Canada. Separate warranties apply for our garage door collections. Any previous warranties will continue to apply to products manufactured by JELD-WEN prior to this date. For additional information, including care and maintenance information refer to www.jeld-wen.com or www.jeld-wen.ca.

What This Warranty COVERS

We warrant to the original owner² that if your JELD-WEN Product exhibits a defect in material or workmanship within the time periods from the date of purchase as specified below, we will, at our option, repair, replace or refund the purchase price of the Product or component part.

Owner-Occupied Single-Family Residence Limited Warranty

Fiberglass Door Slabs: We warrant our fiberglass door slabs for as long as you own and occupy your residence.

Steel Door Slabs: We warrant our steel door slabs for **ten (10)** years from the date of initial purchase.

Wood Door Slabs: We warrant our wood door slabs for **five (5)** years from the date of initial purchase.

Interior Door Slabs: We warrant our interior door slabs for **five (5)** years from the date of initial purchase.

Factory Prefinish: We warrant the factory-applied prefinish on our doors against peeling, checking, or cracking for periods listed below. Should the factory prefinish be proven defective, we will at our option, replace or refinish the door or pay up to credit per opening to the current owner. (Note: this coverage applies to factory-applied finish coat options only; standard factory-applied primer is not a finish coat.)

Product	Coverage	Refinish Credit
Custom Fiberglass Doors	5 years	\$350 per opening
Custom Exterior Wood Doors	1 year	\$250 per opening
Custom Interior Wood Doors	1 year	\$150 per opening
Premium Wood Doors	1 year	\$100 per opening

Door Frames: We warrant our door frames for **one (1)** year from the date of purchase.

AuraLast® Protection for Door Slabs and Frames: Our AuraLast pine wood door slabs will be free from wood cellular structure failure (often referred to as "wood cellular breakdown") caused by decay and/or termites for **twenty (20) years** from the date of initial purchase. Our AuraLast pine door frame components will be free from wood cellular structure failure caused by decay and/or termites for as long as the original consumer owns the home in which the AuraLast wood frames are originally installed. Warranty coverage outside Canada, the contiguous 48 states and Alaska is contingent upon approval from the JELD-WEN Customer Care Department. Please contact us.

Commercial Limited Warranty (Other than Owner-Occupied Single-Family Residence)

Fiberglass, Steel, Wood and Interior Door Slabs: We warrant our door slabs for **five (5)** years from the date of initial purchase.

All Other Products, Components, Prefinishes, and Options as Listed Above: Coverage is the same as for Owner-Occupied Single-Family Residences as listed above.

Transferability

This warranty is not transferable.

How to Get Assistance

If you have a problem with your JELD-WEN Door, immediately upon discovery, contact the distributor or dealer from whom you purchased our product or contact us directly:

In the United States:

Mail: JELD-WEN Customer Care
Attn: Door Warranty Claims
P.O. Box 1329, Klamath Falls, OR 97601
Phone: 800-JELD-WEN (800-535-3936)
Fax: 800-436-5954
Email: CustomerServiceAgents@jeld-wen.com

In Eastern Canada:

Mail: JELD-WEN Service Department
90, rue Industrielle
Saint-Appollinaire, Quebec, Canada G0S 2E0
Phone: 800-463-1930
Fax: 888-998-1599

In Western Canada:

Mail: JELD-WEN Service Department
550 Munroe Avenue
Winnipeg, Manitoba, Canada R2K 4H3
Phone: 888-945-5627
204-668-8230
Fax: 204-663-1072
Email: wpgservice@jeld-wen.com

We can respond quickly and efficiently if you provide the following: a) date and location of purchase, or product identification from the tag on the top edge of the slab, b) how to contact you, c) the address where the product can be inspected, and d) a description of the apparent problem and the product (photographs are helpful).

What We Will Do

Upon receiving your notification, we will send out an acknowledgement within three business days to the contact, which you have provided. We will investigate your claim and will begin to take appropriate action within 30 days after receipt of notification. If it is determined that the product does not have a defect covered by the warranty, we may charge an inspection fee for an on site inspection that is required or requested by you. If we determine that there is in fact a defect we will repair the product, ship a replacement product to the distributor or person making the claim in the same specification as the original product sold to the distributor, or refund the original purchase price paid to us. Replacement components/products are warranted for the balance of the original product warranty or 90 days, whichever is longer. This warranty gives you specific legal rights, and you may have other rights that vary from state/province to state/province.

Continued on next page

If the claimed nonconformity is warp of a door slab, we may defer repairing or replacing the door slab for a period up to **twelve (12)** months from the date of claim. It is not uncommon for a temporary warp condition to occur as the door slab adjusts to local humidity and temperature conditions. This deferral will not be counted against the warranty period.

What This Warranty Does NOT Cover

JELD-WEN manufactures and sells both individual door slabs and complete door systems. This warranty does not cover parts or components (e.g., locksets, handles, etc.) not sold by JELD-WEN to the original owner. See your distributor or dealer regarding the warranty on the entire door system and/or these other components.

We are not liable for:

- Normal wear and tear, including normal wear and tear of weatherstrip; and natural weathering of surfaces or variations in the color or texture of wood or finish; surface cracks that are less than 1/32" in width and/or 2" in length; for knotty alder and juniper: surface checks that are less than 1/8" in width and/or 5" in length, and knot placement, quantity, or size.
- Problems due to misuse or abuse; failure to follow the care and maintenance instructions; or as a result of any cause beyond our reasonable control (e.g. fire, flood, earthquake, other acts of nature, and acts of third parties outside of our control).
- Problems related to: improper field finishing of all surfaces (front and back) and edges (top, bottom, and sides) of the door slab and frame (See our Finishing Instructions at www.jeld-wen.com/resources); variation or unsatisfactory results in sheen or texture resulting from the field application of paint or any other finishing material.
- Failure to provide an adequate overhang for exterior doors; damage caused by extreme temperature buildup where storm doors are present. For general guidelines, see our "Appropriate Protection for Exterior Doors" in our product literature or at www.jeld-wen.com/resources; for specific information pertaining to your structure, consult your contractor or other building professional.
- Warp for any 3'6" wide by 8' 0" high by 1 3/4", or smaller door slab, which does not exceed 1/4" in the plane of the door slab itself; door slabs wider and/or higher are not guaranteed for warp.
- Bow or misalignment in the frame or jamb in which the door slab is hung (if such is purchased from JELD-WEN unmachined and not prehung).
- Slight expansion or contraction due to varying environmental conditions; slab movement (shrinkage or swelling) of 1/4" or less due to temperature and humidity, consult our Care & Maintenance documents on how to work with this natural movement.
- Wood cellular structure failure for wood components other than of AuraLast pine and any components (including pine) that come in direct contact with soil. Note: superficial mold/mildew does not indicate wood cellular structure failure.
- Problems related to water and/or air infiltration due to improper assembly; installation errors or flaws in building design and construction; installation must be in strict conformance with the installation instructions provided by the manufacturer of the door entry system.
- Structural integrity issues or other problems caused by improper field fitting of the hardware, improper sizing of the door slab, or other assembly problems.
- Damage or poor product performance resulting from installation

into a condition that exceeds product design standards and/or certified performance specifications and/or does not comply with applicable building codes.

- Hardware or inserts that are not provided by us, such as locksets, door handles, strikes, etc.
- Discoloration or rusting of decorative metal accent options, such as grilles, clavos, straps, etc.; discoloration of wood sills provided by us.
- Cost for labor, removal or disposal of defective product(s), installation or finishing of the replacement door or component.
- Incidental or consequential damage. Some states/provinces do not allow the exclusion or limitation of incidental or consequential damages, so this may not apply to you.

Important Legal Information

This Limited Warranty document sets forth our maximum liability for our products. We shall not be liable for special, indirect, consequential, or incidental damages. Your sole and exclusive remedy with respect to any and all losses or damages resulting from any cause whatsoever shall be as specified above. We make no other warranty or guarantee, either express or implied, including implied warranties of merchantability and fitness for a particular purpose to the original purchaser or to any subsequent user of the product, except as expressly contained herein. In the event state or provincial law precludes exclusion or limitation of implied warranties, the duration of any such warranties shall be no longer than, and the time and manner of presenting any claim thereon shall be the same as, that provided in the express warranty stated herein. This Limited Warranty document gives you specific legal rights, and you may have other rights that vary from state/province to state/province.

No distributor, dealer or representative of JELD-WEN has the authority to change, modify or expand this warranty.

¹"JELD-WEN Products" shall refer to interior and exterior door slabs and systems manufactured in the United States and marketed under the JELD-WEN brand name for use in the United States and Canada. See our separate Export Warranty for applicable coverage on products used outside the United States and Canada.

² This warranty extends to the original owner (original owner means the contractor/dealer/distributor/purchaser and the initial owner of the structure where the product is initially installed) and is not transferable. The original purchaser of this product acknowledges that they have read this warranty, understand it and are bound by its terms and agrees to provide this warranty to the original owner of the structure into which the product is installed. Should state or provincial law preclude no transferability, then the warranty period is effective as applicable up to **five (5)** years from the date of initial purchase for door slabs and systems and **one (1)** year from the date of manufacture for the factory pre-finish.
